Marlene H. Dortch, Esq.
Secretary Federal Communications Commission
45 L Street NE Washington DC 20554
Re: GN 25-133 DELETE, DELETE, DELETE

One Ministries, Inc. (OMI) requests that the FCC delete the following rules:

> 74.790(o)(1): The FM6 LPTV station must have been providing FM6 operations pursuant to an active engineering special temporary authority on June 7, 2022, or as otherwise permitted by the Commission.
>
> 74.790(o)(7): FM6 LPTV stations may make minor modifications to their technical facilities, as otherwise permitted under part 73 of this chapter or this part, so long as the station's proposed modified "protected contour," as defined in § 74.792, does not exceed its protected contour as it was authorized on July 20, 2023, or where the station can demonstrate that such change is being made due to an engineering necessity such as the loss of a tower site or change in equipment due to malfunction and where the station can also demonstrate that the modification will not cause any interference to other licensed users.

Elimination of these rules will help unleash LPTV broadcasters operating on channel 6 to provide new innovative uses of their spectrum by being allowed to add in an FM carrier to serve niche audiences that are currently underserved. LPTV broadcasters are secondary, and if any bona fide interference issues arise to other FM services, the LPTV broadcaster would already be required to resolve. Continuing to categorically prohibit FM6 operation except for an exclusive list of grandfathered stations is arbitrary and capricious.

Sincerely,

Keith J. Leitch
President, One Ministries, Inc. (KQSL)
